

67w solar control system

Overview

Is Solarban® R67 glass a good insulator?

In the winter, excellent insulating performance (signified by a U-value of 0.25) helps trap furnace heat. Combined, this performance contributes to year-round energy savings. As an added bonus, Solarban® R67 glass has a Tdw-ISO rating of 0.41.

What types of glasses can be used with Solarban® R67 glass?

While clear glass is the standard offering, Solarban® R67 glass also can be specified with blue, green and earth-toned glasses, such as Atlantica®, Azuria®, Optiblu®, Optigray®, Pacifica®, Solarblue®, Solexia® or Solargray® glasses, on the second or third surface of an insulating glass unit (IGU).

What makes a good solar-powered irrigation timer?

Solar-powered irrigation timers must be robust and weather-resistant due to frequent exposure to various outdoor conditions. Typically, the best timers are those made of high-quality materials like metal. Metal timers can withstand extreme temperatures and are less susceptible to accidental bumps or impact damage.
