

Base station power cabinet settings

Overview

What is a base station power cabinet?

The base station power cabinet is a key equipment ensuring continuous power supply to base station devices, with LLVD (Load Low Voltage Disconnect) and BLVD (Battery Low Voltage Disconnect) being two important protection mechanisms in the power cabinet.

How do I set up a base station (fixed location) CB?

When setting up a base station (fixed location) CB, you have two basic choices of CBs: Base Station CB - A base station CB is a table-top model with a built-in power supply. Has a built-in power supply. Just plug it into an outlet. Usually feature-rich with plenty of cool knobs and switches. Easy to access the controls.

What is a base station CB?

Base Station CB - A base station CB is a table-top model with a built-in power supply. Has a built-in power supply. Just plug it into an outlet. Usually feature-rich with plenty of cool knobs and switches. Easy to access the controls. Decent sized speaker for good audio. Costs more. Very hard to find (due to low demand). Not portable.

How many base stations/repeaters can be installed in a cabinet?

recommended when no cabinet fans are used. Up to three base stations/ repeaters can be mounted in a 76.2 cm (30 in) or larger cabinet with two rack units of spacing between each base station/repeater. This will result in thermal specification performance of -30°C (-22°F) to +40°C (+104°F).

How do I pick up a base station/repeater?

DO NOT pick up the base station/ repeater by holding the Preselector (if so equipped). Use the handles on the front of the base station/repeater, or the Power Supply and Power Amplifier casings when picking up the base

station/repeater. Remove the station front bezel from its chassis locking clip by carefully pulling it forward.

How does a base station alarm work?

Sets the length of time that your Base Station (and Extra Sirens if you have them) will sound in the event of an alarm. Changes if the LED light on your Base Station will illuminate to indicate system statuses, warnings, and similar events. Remains lit while the Base Station is receiving power from the power adapter.
