

Bhutan outdoor power supply market

Overview

What is Bhutan's energy supply?

Bhutan's energy supply primarily relies on electricity, fuel-wood, coal, and diesel. Electricity is the largest contributor, with a shift towards increased usage over the years. Fuel-wood usage has decreased, while bio-gas, solar energy, and limited-scale wind energy have gained traction as alternative sources.

Which power plants are used in Bhutan?

In addition to hydropower, the country relies on diesel generators owned by Bhutan Power Corporation (BPC), contributing 8.93 MW to the overall capacity. Furthermore, the grid is connected to solar photovoltaic (PV) power plants with a capacity of 724 kWp and wind power plants with a capacity of 600 kW.

What is the energy consumption pattern in Bhutan?

Indeed, the current energy consumption pattern in Bhutan highlights a significant share of electricity in the fuel mix as the primary energy source, indicating a shift from traditional fossil fuels such as coal, diesel, and biomass.

What is Bhutan's oldest mega power plant?

Chhukha Hydropower Plant: As Bhutan's oldest mega power plant, the Chhukha Hydropower Plant was commissioned in 1986. It has a capacity of 336 MW, with four hydro-turbine units each generating 84 MW. The plant's annual electricity generation exceeds 1,800 GWh, and a significant portion is exported to India.
