

Cambodia communication 5G base station upgrade

Overview

Will 5G be available in Cambodia?

KINGTEL has a master plan to build 3,000 base stations of 5G in Cambodia over 2 to 3 years including the first phase of 5G SA core network, transmission network and related technical equipment. It is expected that 5G SA network will be commercially available and accessible for more than 90% of Cambodian population by the end of 2020.

Will Cambodia support 5G networks in 2023?

In order to support 5G networks, the Cambodian government and mobile service providers have been upgrading the nation's telecom infrastructure. The Cambodian government has set a target of 2023 for the commercial rollout of 5G networks. In order to achieve this goal, the government has allocated 200 MHz of spectrum for 5G use.

Why is Cambodia launching a 5G internet system?

Cambodia is taking bold steps towards strengthening its digital infrastructure with the approval of a nationwide fifth-generation (5G) internet system, authorized by Prime Minister Hun Manet. This move is part of the country's broader strategy to enhance digital government, businesses, and citizen engagement.

Is 5G a long-term solution for Cambodia's digital future?

Additionally, long-term initiatives, such as undersea internet connections, are already in the works. At a recent conference summarizing Cambodia's digital progress from 2020 to 2024, Cheang Sopheak, the director-general of MPTC's Directorate General of Radio Frequency Spectrum Management, discussed the transformative potential of 5G.

Will 5G help Cambodia become a leader in Southeast Asia?

The successful deployment of 5G will help Cambodia accelerate its digital

economy and establish itself as a leader in Southeast Asia's telecommunications landscape. In parallel with the 5G initiative, Japan is enhancing its cybersecurity cooperation with Cambodia, pledging JPY 750 million (US\$5 million) to improve the country's digital security.

How much spectrum is needed for 5G in Cambodia?

In order to achieve this goal, the government has allocated 200 MHz of spectrum for 5G use. The government has also established a task force to oversee the development and deployment of 5G in Cambodia. Several mobile operators in Cambodia have expressed interest in deploying 5G networks.
