

Cambodia outdoor power supply procurement

Overview

How much money does Cambodia need to build a power plant?

The Cambodian government has stated in its PDP that it will need \$9 billion of investment to develop new power plants and expand the national grid, of which \$2.5 billion has been approved between 2022 and 2025. Opportunities exist for power generation and transmission equipment.

Will Cambodia stop coal power plant investments after 2024?

The government has pledged to cease new coal power plant investments after 2024 and prioritize renewable energy, aligning with its Power Development Master Plan (PDP) 2022-2040. In March 2023, Cambodia launched the Principles for Permitting the Use of Rooftop Solar Power, ensuring transparency and accountability in solar energy adoption. FACT.

How much electricity does Cambodia have?

FACT Cambodia's total installed electricity capacity amounted to 5,044 megawatts (MW) last year, up 8.5 percent from 4,649 MW in 2023, a report from the Electricity Authority of Cambodia (EAC) showed on Monday.

Why is electricity so expensive in Cambodia?

Electricity prices in Cambodia are among the most expensive in the region due to a shortage of integrated high-voltage transmission systems and the high cost of imported diesel fuel. Power in provincial cities is more expensive and less reliable than the supply in Phnom Penh.

What will Cambodia's energy demand look like without EE?

Power Development Plan 2021-2040 [Draft] Figure and table of the medium-case energy demand forecast. Without EE, Cambodia's energy demand is projected to rise to 24 TWh by 2025, 36 TWh by 2030, 50 TWh by 2035, and up to 66 TWh by 2040. The whole plan horizon: AAGR ~ 9% without EE. Only generation cost, excluding emission cost.
