

China Communications 2MWH 5G base station

Overview

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) announced during its annual work conference.

How many people use 5G in China?

China now has over 2.34 million 5G base stations, and the number of 5G cellphone users has surpassed 575 million, according to Jin, noting that 5G technologies are widely applied in the economy, most prominently in the sectors such as mining, power supply, and the making of large jetliners.

How many 5G stations will China add this year?

The country plans to add around 600,000 such stations this year, and expand the coverage of 5G services in rural areas and industrial parks, Jin told journalists on the sidelines of the ongoing "two sessions."

What will China do with the 5G push?

Alongside the 5G push, China will also start trials for 10-gigabit optical networks and optimize computing power centers amid an artificial intelligence (AI) boom brought on by ChatGPT.

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom. In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.

How many 5G phone subscriptions are there in China?

China's 5G mobile phone subscriptions surpassed 1 billion by the end of November, local press reported, citing data released by the Ministry of Industry and Information Technology. The 5G subscriptions now represent 56% of all mobile lines in China, reflecting a 9.4 percentage point increase compared to the previous year.

China Communications 2MWH 5G base station

[China has more than 3.8 million 5G base stations](#)

There were more than 3.8 million 5G base stations in China by the end of May 2024, the latest data from the Ministry of Industry and Information Technology (MIIT) has shown.

[China 5G rush - 4.5m 5G base stations, 300 5G-A ...](#)

Known as the second "Set Sail" action plan, it prioritizes consumer-oriented applications and aims to: increase 5G base stations to 38 ...

China plans to upgrade its 5G network, accelerate 6G innovation, ...

China will continue to accelerate the research, development, and innovation of 6G cellular technology and upgrade its 5G mobile network to reach 5G-A level in its new data ...

China's 5G subscriptions surpass 1 billion amid strong uptake

Earlier this year, industry calculations indicated that China's 5G base stations -- the relay point between mobile phones and the larger internet -- accounted for more than 60 ...

[Ambitious 5G base station plan for 2025](#)

China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the ...

[China home to over 3.5M 5G base stations](#)
