

Container communication site distribution box

Overview

Can ec&s build a power distribution system inside a shipping container?

EC&S can design and build entire electrical power distributions systems inside shipping containers, and install them on your site. With a containerized system, you can greatly decrease the timeline of construction, while increasing the quality of workmanship.

What features are included in a container comms room?

There is also two wall penetrations with gland plates for cabling and racking to be installed. This Container Comms Room has all the features to make a comfortable work space for staff including air conditioning and internal wall insulation. Take a look at the video below to see the inclusions of this Container Comms Room design.

What is a small distribution substation?

Smaller distribution substations are subdivided into container-sized modules, which can be manufactured, assembled and tested at the factory, allowing easy transport and fast installation and commissioning at site.

Can ec&s manufacture containerized electrical rooms?

Not only can EC&S manufacture containerized electrical rooms, but we can also engineer pump rooms, fire suppression rooms, battery back-up or power supply rooms in the same footprint.

Can a shipping container be placed outside?

All the while, providing a shorter time-line to start-up and commissioning. Since the shipping container is manufactured to withstand the ocean environment, it is ideal to be placed outdoors.

Why should you use a containerized construction system?

With a containerized system, you can greatly decrease the timeline of construction, while increasing the quality of workmanship. Three elements that are unpredictable on the job site are: the skill set of the workers, the environment and the proper tools available to do the job right.
