

Croatia outdoor power supply quotation

Overview

How is electricity supplied in Croatia?

Customers in Croatia are supplied with electricity from power plants in Croatia, from power plants built in neighboring countries for Croatia's needs and with electricity procured from abroad. By its size, the Croatian power system is one of the smallest power systems in Europe.

What is a Croatian power system?

The Croatian power system comprises plants and facilities for electricity production, transmission and distribution in the territory of the Republic of Croatia.

What power outlets does Croatia use?

If you're coming from an extended European sojourn then you needn't stress because the country uses the same power outlets as (almost) the rest of the Eurozone. Specifically, Croatia runs on type C and F plugs, although the outlets work with type E as well. You can see we have a picture here to help you visualize it.

Is Croatian power system a transit system?

By reconnecting the UCTE synchronous zones 1 and 2, the Croatian power system has become a transit system again. The Croatian power system is a control area by HOPS. Together with the Slovenian power system and the power system of Bosnia and Herzegovina it constitutes the control block SLO - HR - BIH within the ENTSO-E association.

Do I need a transformer or adaptor for Croatia?

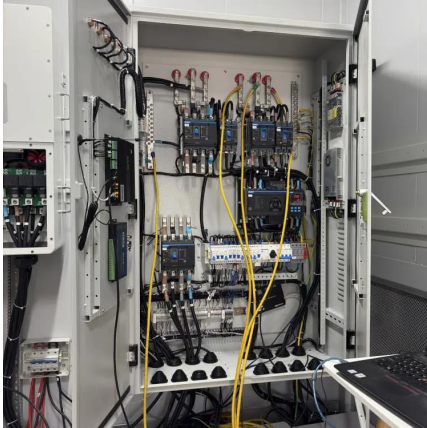

The adaptor for Croatia The voltage in Croatia is 220V; the frequency is 50HZ. Plugs are two round prongs. All is well for continental Europeans but Americans have flat prongs and 120volt/60HZ appliances. Before leaving home, find out whether you'll need a transformer or an adaptor or both. They

are not the same thing!
