

# Double glass components frame

## Overview

---

The entire window system has components and exterior parts that need replacement over time. It's crucial to get the hang of the core window parts since each window style is different. Here's a list of the essential parts of a window and a breakdown of how they work together.

The window frame is the exterior structure that holds all the panes in place. A window frame consists of the head, jamb, and sill. Together, they hold the window in place. Windows with.

Hardware refers to the window parts you use to open and secure your windows. 1. Sash lock- The sash lock prevents the window from.
