

Energy Storage Project Bid Opening

Overview

Any interested bidders must submit a Phase I offer no later than 5 p.m. EPT on August 4, 2025. NYSEG and RG&E will review bidder submissions to Phase I, and notify bidders of their approval to submit a Phase II bid on September 22, 2025. Will Con Edison & O&R get 10 MW of energy storage?

The solicitation meets the requirements of a 2022 New York State Public Service Commission order requiring Con Edison to procure 300 MW and O&R to procure at least 10 MW of energy storage by 2030, the utilities said. The joint solicitation moves New York closer to meeting its goal of deploying 6 GW of energy storage by 2030.

How many MW of energy storage will New York have?

Two affiliated New York utilities are soliciting at least 310 MW of utility-scale energy storage resources across multiple smaller portfolios that can connect to the state grid by the end of 2030 on contracts of up to 15 years, according to a Dec. 16 request for proposals.

How much new energy storage will New York have in 2024?

It calls for 3 GW of new utility-scale storage, 1.5 GW of new retail storage and 200 MW of new residential storage to complement about 1.3 GW of existing energy storage on New York's grid as of mid-2024.
