

Estonian photovoltaic solar panel manufacturers

Overview

Why should you install solar panels in Estonia?

The energy productivity of solar panels installed in Estonia is equivalent to the southern countries, as Estonia's cooler climate increases the efficiency of solar panels. We offer our customers turnkey construction of a solar park, starting from the design to the connection point, the construction of substations.

How much solar radiation does Estonia produce a year?

In Estonia, the amount of solar radiation is comparable to Central Europe; the average amount of radiation has an optimal slope and azimuth of 1100-1200 kWh/m², 85% of which falls between April and October. An optimally installed 1 kW PV plant produces 900 to 1000 kWh of energy per year.

How many solar panels can a BIPV factory produce?

Estonian BIPV specialist Solarstone said this week that it has built a new 60 MW factory in Viljandi, Estonia. The site has the capacity to assemble 13,000 integrated solar panels per month, according to the company, enabling the supply of 6,000 homes with 10 kW solar roofs.
