

Ethiopia new solar system quotation

Overview

Does Ethiopia have a solar system?

In Ethiopia that is not entirely true. The Ethiopian government bought around 40,000 Home Solar Systems (SHS) and some larger Institutional Solar Systems in China starting around 2014 with a battery storage and a maximum output power of about 50 W per panel under optimum solar irradiation conditions.

Is solar a viable option in Ethiopia?

But our previous study identified that the policy makers in Ethiopia believe that solar is too costly and not a viable option . The current electricity tariff in Ethiopia is highly subsidized and one of the lowest in Africa. The tariff depends on the monthly energy consumption and varies among user classification.

How much power does Ethiopia have?

According to the International Renewable Energy Agency (IRENA), Ethiopia had just 21 MW of installed PV capacity at the end of 2022. With an estimated population of around 110 million, landlocked Ethiopia has around 4.5 GW of power generation capacity at present – most of it hydropower.
