

# **High temperature lithium battery pack customization**

## Overview

---

What is a custom battery pack?

Engineers design and tailor custom battery packs to meet the specific requirements of a particular device or application. Unlike off-the-shelf batteries, manufacturers build custom packs to exact specifications, considering size, shape, voltage, capacity, and environmental conditions.

Why should you choose a custom lithium-ion battery?

With stringent adherence to safety standards and compatibility with diverse drone systems, our custom lithium-ion batteries cater to the unique needs of aerial photography, surveillance, mapping and surveying, search and rescue, agricultural, and more.

What is a custom battery pack assembly service?

CMB's custom battery pack assembly services involve evaluating battery chemistries, casing design, and management systems based on customer needs. The process encompasses basic and advanced lithium battery pack design features, each tailored to meet specific requirements.

What is a custom LiFePO4 battery pack?

Our custom LiFePO4 battery packs are made in cylindrical and prismatic formats. LiPo batteries allow for greater flexibility and ensure the perfect fit for vehicles, machinery, and other various devices with unusual dimensions and weight requirements. Why Choose CMB As Your Custom Battery Pack Manufacturer?

How do I design a custom battery pack?

Designing a custom battery pack involves several crucial steps: 1. Requirements Analysis The first step in creating a custom battery pack is thoroughly analyzing the device's power requirements. This includes: 2. Chemistry Selection Based on the requirements, engineers select the most

appropriate battery chemistry. Common options include:.

What temperature does a custom 18650 battery work?

Our high-temperature batteries work from -40°C to 85°C. With a wide range of capacity options and flexible configurations, the custom 18650 battery pack is a popular choice for medical devices, robotics, and IoT applications. Our CTO proudly has more than 15 years of experience in cell chemical study and 18650 cell manufacturing.
