

How many base stations are there in the container

Overview

There are five different container types that can be bought on the market, which differ in their functionality and purpose. Containers can not be put into other containers, therefore it is impossible to build any.

What is the difference between a station container and a warehouse container?

A station container is 10,000 m³ packaged, and 2,000,000 m³ assembled. A vault container is 50k m³ packaged, and 5 mil m³ assembled. A warehouse container is 100k m³ packaged, and 10 mil m³ assembled. Generally, these are built on-site at a station. But you could move a few of the small ones at a time in a pinch if you use a DST.

Where should a station container be built?

I'll just wade through my mess Most Station Containers needs to be build where they are needed as they do have a high volume even when packaged; 10.000, 50.000 or 100.000m³ for Station Container, Station Vault and Station Warehouse respectively.

How many M3 are in a warehouse container?

Build one. Much easier to just build them where you need them. They are big, even when packaged. A station container is 10,000 m³ packaged, and 2,000,000 m³ assembled. A vault container is 50k m³ packaged, and 5 mil m³ assembled. A warehouse container is 100k m³ packaged, and 10 mil m³ assembled. Generally, these are built on-site at a station.

What is a station container?

Although the construction of a Station Container is much like that of other Cargo Containers a Station Container is far too big to fit in a ship's cargo hold and is only used for storage and inventory management at stations. Cargo containers allow for extra storage while either being deployed in space, inside a cargo hold, or inside a station.

How many numbered storage units can be built in a base?

2.20 Synthesis - Slots increased, used to be 5. Containers can now be named. Each numbered storage unit can be built once per base & will access the same items as the same numbered storage built elsewhere. There are 50 slots in each container / unit & you can build 10 different ones.

Can a station container be jettisoned?

Station containers can not be jettisoned nor launched into space. Assembled, they are too large to fit inside any ship's cargo hold, meaning they can only be used in stations for organizational purposes. They contain auditing functionality, which stores a log showing:
