

How much does a 5kW solar panel cost

Overview

On average, a 5 kW solar panel system costs \$13,550, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state. How much does a 5 kW solar system cost?

A 5 kW solar panel system costs \$13,550 in 2025 before incentives. A 5 kW solar panel system produces about 7,260 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. The federal solar tax credit ends December 31, 2025—homeowners have only until the end of this year to secure 30% savings.

Can a 5kw solar system save you money?

One of the most significant advantages of a 5kW solar system is its ability to save you money on electricity bills. On average, this system can save you up to \$1,551 per year. Over the 25-year lifetime of the solar panels, the total savings can amount to an impressive \$38,781. The rising cost of electricity is a major concern for many homeowners.

How many solar panels does a 5 kW solar system need?

Since most panels have a capacity of 300 watts, you would need 17 or more panels to achieve a total output of 5kW. If you need different power requirements, check out 4.5 kW solar systems How Big is a 5 kW Solar System?

.

How big is a 5kw Solar System?

Considering that each panel occupies approximately 17 square feet, the total footprint of a 5kW solar system with 17 panels would be around 283 square feet. It is essential to consider available space when planning for the installation of solar panels. How Many kWh Does a 5kW Solar System Produce?

(Load Per Day).

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

Why should you install a 5kw Solar System?

By installing a 5kW solar system, you can significantly reduce your reliance on utility companies and mitigate the impact of rising electricity costs. The more self-generated electricity you consume, the less you have to pay to utility companies. Furthermore, the excess electricity that your 5kW solar system generates can be sold back to the grid.

How much does a 5kW solar panel cost

What does a 5,000 watt (5 kW) solar system cost in the U.S.?

Prices will vary based on the size of your system, the type of equipment you choose, and the state that you live in. Learn more about how much solar panels cost, how ...
