

How much does a mobile base station power supply cost

Overview

How much power does a cellular base station use?

This problem exists particularly among the mobile telephony towers in rural areas, that lack quality grid power supply. A cellular base station can use anywhere from 1 to 5 kW power per hour depending upon the number of transceivers attached to the base station, the age of cell towers, and energy needed for air conditioning.

What is base power?

Base Power doesn't just provide reliable power for individual homes—Base is redefining how energy storage systems can support the entire power grid. How much does Base cost?
