

How to use the base station communication equipment suitcase

Overview

What is APX transportable base station?

The “mouse-hole” exit for a power cable allows for covert closed case operations. Engineered with top panel quick connections for efficiency, the APX Transportable Base Station is the ideal solution for federal agencies and first responders on the move. Aluminum lockable suitcase makes for convenient transportation.

Which receivers are suitable for use as base station?

Suitable products range from dedicated reference stations (e.g. PolaRx5) over smaller, more simple integrated receivers aimed at reference network applications and network densification (such as the AsteRx SB3 ProBase) to easy to use and fully integrated (survey) products.

What should I look for when choosing a base station?

There are two main things to watch out for when selecting a receiver to use as a base station. Firstly, the receiver must be able to output differential corrections (RTCM is strongly preferred).

How do I choose a base station antenna?

There are several things to consider when choosing a base station antenna such as the size and weight of the antenna, whether the antenna installation will be permanent or not, and whether a relative or absolute calibration is available for this antenna.
