

Irish voltage stabilizer inverter manufacturer

Overview

What is a voltage stabilizer?

OXYGEN – Regulating Speed <3 milliseconds Our voltage stabilizers are designed to operate with a rated voltage in accordance with the International Norm IEC 60038 and are to be connected between main power supply and load. The purpose is to supply the loads with a stabilised voltage having an input voltage variable in relation to the rated value.

How are voltage stabilizers cooled?

The voltage stabilizers are housed in a metal enclosure with RAL 7035 finish and IP21 protection class, suitably sized according to power rating. Depending on the model, the stabilizers are cooled by air (natural or aided convection).

Does reliance stock invertex & Bosch inverters?

Reliance stock an extensive range of Invertex and Bosch Inverters (VSDs). Non stocked variable speed drives can be sourced at short notice by contacting Reliance directly. Stocked in Ireland across four locations - Cork, Dublin, Antrim and Limerick.

How many volts can a voltage stabilizer operate?

Our voltage stabilizers can operate with a load variation range from 0 to 100% on each phase, the response time depends on the input voltage percentage variation and on the type of design (indicatively, it can vary between 12,5V/sec and 1300V/sec).
