

Israel s new outdoor power supply market

Overview

Does Israel have a new electricity sector?

In June 2018, the Government of Israel approved a comprehensive structural reform in the Israeli electricity sector, planned to be implemented over the course of 8 years (2018-2026). As part of the reform, IEC's share in electricity generation will be reduced from 60% to 40%.

How does Israel respond to electricity consumption forecasts?

In light of these challenges, the Government of Israel is promoting several programs to respond to electricity consumption forecasts, while reducing pollution and increasing the use of natural gas and renewable energy.

When will energy storage facilities be built in Israel?

(3) The Electricity Authority will publish a tender in September 2023 for the establishment of Energy Storage facilities with a total capacity of 900MW. Israel plans to use its abundant gas resources to leverage the development of a gas-based auxiliary industrial sector.

How much power will Israel have in 2021?

Overall installed capacity in 2021 totaled 21.5 GW, with parastatal company Israel Electric Corporation (IEC) accounting for 61% of production, with independent power producers accounting for the remainder. According to the Electricity Authority, installed capacity in 2025 should reach 27.9 GW to meet the electricity consumption forecasts.

How much power will Israel have in 2025?

According to the Electricity Authority, installed capacity in 2025 should reach 27.9 GW to meet the electricity consumption forecasts. In June 2018, the Government of Israel approved a comprehensive structural reform in the Israeli electricity sector, planned to be implemented over the course of 8 years (2018-2026).

How much energy does Israel use?

Gasoline and diesel prices peaked in 2021, and both fell by 9% in 2022. Israel's consumption per capita is 2.5 toe (i.e., 20% less than the Middle East average), including around 6 500 kWh of electricity (65% above the regional average) (2023).
