

# Lesotho makes outdoor power

## Overview

---

Does Lesotho need electricity?

The country is renowned for an abundant supply of unspoilt and unexploited water resources, capturing approximately 50% of Southern Africa's total catchment run-off, therefore, hydropower contributes to most of its electricity needs . When it comes to energy access, Lesotho is considered one of the lowest in Africa .

Can Lesotho become an energy exporter?

Energy independence / Lesotho can meet its own energy needs and potentially become an exporter of clean energy, setting an example for the entire region, and reducing its current energy import bill.

What is renewable Lesotho?

Renewable Lesotho brings together a toolbox of instruments, including:  
Infrastructure development: supporting a pipeline of projects ranging from off-grid solutions, mini-grids, solar home systems, to potential larger investments in hydro-, solar, including floating solar, wind energy, and transmission.

Who is responsible for Energy Management in Lesotho?

According to SE4ALL report for Lesotho, The Ministry of Natural Resources through the Department of Energy is responsible for the overall administration and coordination of energy in Lesotho.

What is Lesotho solar energy society?

Lesotho Solar Energy Society (LeSES) acts as a platform for the industry and clean energy expert groups to exchange information and implementation of an industry code of practice. Hlotse, Leribe, Lesotho. Decentralized renewable energy production (biogas and solar) and energy saving technologies (stoves), technical training.

Who owns Lesotho Electricity Corporation (LEC)?

Lesotho Electricity Corporation (LEC) generates, transmits, and distributes electricity. The company also owns and operates hydro power stations. LEC is wholly owned by the Government of Lesotho (GoL). The Basotho Enterprises Development Corporation (BEDCO) is a parastatal of the Government of Lesotho.
