

Mexican government energy storage project

Overview

A month after India introduced an energy storage mandate for renewable energy plants and China scrapped its own, Mexico has stepped forward with an ambitious 30% capacity requirement, alongside plans to add a further 574 MW of batteries by 2028. Does Mexico have a 30% energy storage mandate?

A month after India introduced an energy storage mandate for renewable energy plants and China scrapped its own, Mexico has stepped forward with an ambitious 30% capacity requirement, alongside plans to add a further 574 MW of batteries by 2028.

How does Mexico regulate energy storage systems?

The Mexican government recently issued general guidance to regulate energy storage systems. These rules outline the process and rules for integrating storage systems with different types of facilities, including power plants, behind-the-meter installations, load centers and distributed generation projects.

Why did Mexico introduce a new interconnection policy in May 2020?

In May 2020, the Mexican government introduced a policy that, under the pretext of grid reliability, sought to grant interconnection priority to CFE's strategic projects, impose stricter requirements for renewable energy projects to obtain generating permits, and require payments for additional ancillary services to offset intermittency.
