

# Mobile Energy Storage ESS Base Station Battery

### **Overview**

What is a mobile energy storage system?

An energy storage system contains a large amount of energy stored in a small space, which may make it the target for those who look to cause harm. For this reason, a deployed mobile energy storage system is required to be provided with a fence with a locked gate that keeps the public at least 5 ft (1.5 m) away from the ESS.

How big is the battery market for energy storage systems (ESS)?

The global battery market for energy storage systems (ESS) is expected to grow by USD 24.08 billion from 2021 to 2026, attaining a CAGR of 34.5%. 57% of the market's growth will originate from APAC during the forecast period.

Are lithium-ion batteries included in a mobile energy storage standard?

It also goes on to mention that the storage of lithium-ion batteries is included in the scope of the document. The application section then limits the application of the standard to certain-sized mobile energy storage systems.

How far can a mobile energy storage system be deployed?

Additional limitations for where a mobile energy storage system can be deployed include a 10 ft (3 m) limitation on how close it can be to various exposures and a 50 ft (15.3 m) limitation on how close it can be to specific structures with an occupant load of 30 or greater.

Are mobile energy storage systems ready for a 2023 New Year's Day fire?

Mobile energy storage systems are being deployed in jurisdictions around the world, and—as demonstrated by a 2023 New Year's Day mobile energy storage system fire —accidents can happen. We want to make sure communities are prepared for when these systems are deployed in their backyard.

### Are mobile energy storage systems NFPA 855 compliant?

When charging and storing a mobile energy storage system, the requirements are relatively straightforward. The system should be treated as a stationary system as far as the requirements of NFPA 855 go. These requirements will vary based on whether the system is being stored indoors, outdoors, on a rooftop, or in a parking garage. In-transit

## **Mobile Energy Storage ESS Base Station Battery**
