## Overview

---

What is a 320W monocrystalline solar panel?

The 320W monocrystalline solar panel comes with PERC technology. Monocrystalline solar panels are a type of solar panels, and this specific one has a capacity of 320 watts. The main difference between monocrystalline solar cells and PERC solar cells is the passivation layer added on the backside of the solar cell.

What is a 300W monocrystalline solar panel?

A 300W monocrystalline solar panel is a lightweight solar panel that enhances module efficiency while minimizing its weight. It is the perfect option for any off-grid solar system, especially for transportation applications such as RVs and boats. This monocrystalline solar panel features a lightweight substrate and laminate, making it suitable for outdoor applications.

What is a 370-watt solar panel made of?

The TSM-370DE14A (II) 370-watt solar panel is made of 72 Trina Mono PERC cells, an anodized aluminum frame, and a white backsheet. It offers high-output performance for ground-mount installations, combining efficiency, reliability, and quality.

Are Trina 370w solar panels reliable?
