

New energy storage project construction in Denmark

Overview

European Energy, in collaboration with Kragerup Estate, has initiated its first large-scale battery storage project in Denmark. The battery, expected to begin test operations in Q1 2025, will support the integration of renewable energy into the power grid. Does European energy have a battery storage project in Denmark?

European Energy breaks ground on battery storage in Denmark together with Kragerup Estate. Project to provide operational experience for European Energy in integration of battery solutions. Copenhagen, Denmark, 20th of January 2025 – European Energy has started on its first large-scale battery storage project.

What is European energy's new battery storage project?

This is done in collaboration with Kragerup Estate. This is the first battery storage project that European Energy has undertaken in Denmark, and it will provide valuable operational experience in integrating battery solutions with the grid for the company.

What is European energy's new Bess project?

European Energy's new BESS project marks a significant step in the company's strategy to support the integration of renewable energy systems and improve energy efficiency in Denmark and beyond.

Is Kragerup estate sustainable?

At Kragerup Estate, we are committed to sustainability, and this project demonstrates our dedication to integrating the latest renewable energy technologies," said Regitze Dinesen, owner of Kragerup Estate. Kragerup Estate, a family-owned estate, has long pursued a green agenda with a focus on environmental protection.
