

# PV panel rooftop cost

## Overview

---

It costs around \$30,000 to install solar panels. That's a big number, but incentives usually lower it significantly. The average U.S. solar shopper needs about 11 kilowatts (kW) of home solar to cover their electricity usage. How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a solar roof cost?

For example, Tesla Solar Roof costs around \$75,000 for a complex design. However, if you have a smaller home or want to install only a few integrated solar shingles, you might be able to finish your project for as little as \$15,000, with all fees included. A solar roof can save you money on your energy bills, so you recoup the cost in the long run.

How much does it cost to install and manage solar panels?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. <sup>1,2,12</sup> This figure includes the solar panels, the installation, and other expenses.

How much does a 12 kW solar panel cost?

The average cost of a 12 kW solar panel installation on EnergySage is \$20,754 after the federal tax credit. You'll probably save anywhere from \$34,000-\$120,000 over 25 years by going solar. Solar panels are just 12% of the total cost of a solar panel installation.

What is the average cost of a 5kW solar panel system?

The national average residential solar cost per watt installed is \$3.10 for a

typical 5kW (approximately \$15,500) PV solar panels system when installed by local installers, before the 26% solar investment tax credits from the federal government.

How much does a monocrystalline solar panel cost?

Monocrystalline solar panels are the most popular choice for residential installation (nearly all residential solar panels installed in 2022 were monocrystalline) because they have the highest efficiency rates from 17% to 22%. The average cost for these panels is between \$1 and \$1.50 per watt, but prices may differ depending on location.
