

Photovoltaic panel greenhouse manufacturer in the Republic of South Africa

Overview

Does greenhouse recommend a solar system?

At GreenHouse, we only recommend products we've tested, installed, and trusted — over years, not months. If it doesn't last, perform, or deliver value, it doesn't make the cut. A world-class solar system isn't just about installation — it starts with intelligent design and is brought to life by the right hands.

Is greenhouse a Certified Energy installer?

Proven. GreenHouse is proudly accredited by the world's leading energy technology brands. As an Authorised Victron Energy Installer, Certified Tesla Powerwall Installer, and Sigenergy Certified Service Partner, we deliver systems that are not only expertly designed – but officially supported and trusted by the manufacturers themselves.

What is the greenhouse standard?

That's the GreenHouse standard. Modular and Customisable. This setup offers high configurability, allowing us to tailor a system exactly to your needs. It's an excellent choice if you want a bespoke solution – for example, integrating solar with backup power or designing an off-grid system.
