

# Poland s new monocrystalline photovoltaic panel market

### **Overview**

Will photovoltaics grow in Poland in 2025?

Changes, forecasts and trends of photovoltaics in Poland in 2025. The photovoltaic market in Poland is growing rapidly in 2025, becoming a key component of the renewable energy sector. The installed capacity of photovoltaics is expected to reach 22 GW, a significant increase compared to earlier years.

How big is Poland's photovoltaics market compared to 2022?

Polish photovoltaics reached an installed capacity of 17.08 GW at the end of 2023, and 17.73 GW at the end of the first quarter of 2024. Compared to 2022, the growth of new capacity in absolute terms was similar at around 4.6 GW, but the structure of the market has changed markedly.

What are the development prospects for large photovoltaic farms in Poland?

The year 2025 brings significant changes to the sector of large photovoltaic farms in Poland. Despite some challenges, the development prospects for this market segment remain optimistic. According to forecasts by the Institute of Renewable Energy, the total installed capacity of large PV farms could reach 10 GW by the end of 2025.

Is Poland the fastest growing solar market in Europe?

Despite the challenges mentioned above, Poland remains one of the fastest-growing solar markets in Europe and ranks third in the top 10 solar PV market additions list for 2023-2026. The solar industry in Poland is driven by government incentives, favorable solar conditions, and the country's commitment to renewable energy.

Are solar panels a good idea in Poland?

Solar energy also has high public support in national polls. A survey commissioned by the Polish Photovoltaic Association in 2022 revealed that

more than half of the Poles want solar installations in their neighborhoods, while 2 out of 5 respondents think installing solar panels on all buildings is a good idea.

What are the conditions for solar energy generation in Poland?

Poland has favorable conditions for solar energy generation, with a good amount of sunlight throughout the year. The government has introduced several measures to promote the development of the solar industry, including feed-in tariffs, net metering, and renewable energy auctions.

# Poland s new monocrystalline photovoltaic panel market

### **SUMMARY**

Polish photovoltaics reached an installed capacity of 17.08 GW at the end of 2023, and 17.73 GW at the end of the first quarter of 2024. Compared to 2022, the growth of new capacity in ...
