

Price of power storage vehicle in Kazakhstan

Overview

How many charging stations does Kazakhstan need?

In order to support the development of e-mobility, Kazakhstan needs at least 40,000 charging posts or 8,000 charging stations with 5 charging posts each across the country. This demand provides a huge opportunity for the charging pile market.

What factors drive the EV market in Kazakhstan?

Infrastructure development of charging piles is one of the key factors driving the EV market. Currently, the number and coverage of charging piles in Kazakhstan are relatively low, with only 81 charging stations available across the country, and they are mainly concentrated in the cities of Almaty and Nursultan.

How many charging stations will Kazakhstan have by 2030?

According to the Ministry of Energy, the charging pile market in Kazakhstan will reach 8,000 charging stations by 2030, a 3,900% year-on-year increase.

Will Kazakhstan's new electric vehicle and charging pile market grow?

The new energy electric vehicle and charging pile market in Kazakhstan, although currently small, is expected to achieve rapid growth in the future with government policy support and increasing social acceptance.

Why is EV charging a problem in Kazakhstan?

The main problem in Kazakhstan is the low number of EV charging stations outside major cities such as Almaty, Astana, Shymkent, and their absence on highways, which prevents travelling by car between cities and countries.

How to develop the electric vehicle sector in Kazakhstan?

Developing the Electric Vehicle Sector in Kazakhstan A key factor for

development is the adoption of legislation and regulations that promote the development of electric vehicles and infrastructure, including safety standards, environmental requirements and economic incentives, to improve the current situation.
