

Russian photovoltaic container custom manufacturer

Overview

What is a mobile photovoltaic system?

That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced container technology.

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

Where are photovoltaic modules made?

Modern production site is located in the Central part of the Russian Federation, on the territory of the former PCMP plant in Podolsk. The annual production capacity of monocrystalline and multicrystalline silicon wafers for high-efficiency photovoltaic modules makes 220 MW.
