

Serbia energy storage discharge price

Overview

Does Serbia use energy units?

Serbia uses energy units. The Energy Law established an independent Republic Commission on Energy Network to exercise control over the electricity and gas transmission system operators (TSOs) and enabled Transportgas Srbija's long-awaited unbundling and certification.

What is the energy sector like in Serbia?

Serbia's energy sector predominantly relies on fossil fuels, with coal playing a central role in electricity generation. The country's abundant lignite reserves are a significant contributor to its energy mix, powering major thermal power plants.

Does Serbia have a diversified energy source?

While coal dominates, efforts are underway to diversify Serbia's energy sources, particularly towards increasing the share of renewable energies like hydro, wind, and solar power, in response to environmental concerns and global energy trends.

Why are electricity prices so high in winter in Serbia?

If, on the other hand, the production of electricity is small and demand is high, prices will increase. Therefore, the price of electricity is often highest in winter, as the need for electricity for heating is highest. Electricity spot prices in Serbia today, hour by hour. Including prices for the last 30 days.

Is the electricity integration package (EIP) transposed in Serbia?

The Electricity Integration Package (EIP) has not been transposed in Serbia by the deadline of 31 December 2023, but the progress has been made in amending the Energy Law which is finalised following the public consultation and the Secretariat's review and submitted to the governmental procedure.

Where can I find total energy balance of the Republic of Serbia?

Total Energy Balance of the Republic of Serbia for chosen year is available [HERE](#). Construction of energy balances according to the old Eurostat concept can be realised on data which are in the database called Annual data - archive. The data were archived by the end of 2017 and will not be corrected in the future.
