

# Serbia solar power supply system

#### **Overview**

This 170km pipeline, becoming operational in December 2023, will allow gas to be supplied to Serbia from Azerbaijan, with whom Serbia has signed a supply agreement.

in is dominated by , despite the public preference for .In 2021 Serbia's total was almost 700 , with the energy mix comprising coal.

(NIS) is the only company in Serbia which deals with exploration and production of crude oil and gas, as well as with production of geothermal energy.

On 6 October 1893, the first Serbian power plant, located in the urban neighborhood of Belgrade, began production of electricity. In 1900, the first.

The main producer of electricity in Serbia is . The company has an installed capacity of 7,662 and generates 38.9 of per year. Its installed capacity in is 4,390 MW, gas-fired and liquid fuel-fired .

Bioenergy and hydroelectric power were the leading contributors within the renewable energy category, accounting for 67% and 29% of the renewable supply, respectively.

The Government of Serbia has signed an agreement with the Hyundai Engineering-UGT Renewables consortium on building solar power plants with a total connection capacity of 1,000 MW (1,200 MW in nameplate capacity), along with battery systems for electricity storage of up to 200 MW/400 MWh.
