

Should I install a solar power system

Overview

Where can solar panels be installed?

The roof of your home is the most common site for solar panels — but it's not the only place they can go. Homeowners who can't get rooftop solar panels can get creative and find another site. Solar panels can be installed on a carport, gazebo, or pergola.

Are solar panels right for You?

Solar panels are best for people who live in good solar states with solar-friendly policies, like net metering and solar incentive programs. Homes with south-facing roofs and lots of unshaded space are also ideal for solar. Homeowners with high electricity bills are among those who can benefit the most from going solar.

Is a home solar energy system a good option?

A home solar energy system is one of the most popular and efficient alternatives to traditional power sources. Solar panels have many environmental benefits and can save homeowners money over the long term. While costs have decreased over the past years, installing and maintaining solar panels can still be expensive.

Can solar panels be installed on a roof?

Solar panels are built to work in all climates, but in some cases, rooftops may not be suitable for solar systems due to age or tree cover. If there are trees near your home that create excessive shade on your roof, rooftop panels may not be the most ideal option. The size, shape, and slope of your roof are also important factors to consider.

Should you install energy storage with a solar system?

Installing energy storage with a solar system can help utilize the power generated when it's needed most, regardless of whether it's sunny outside at

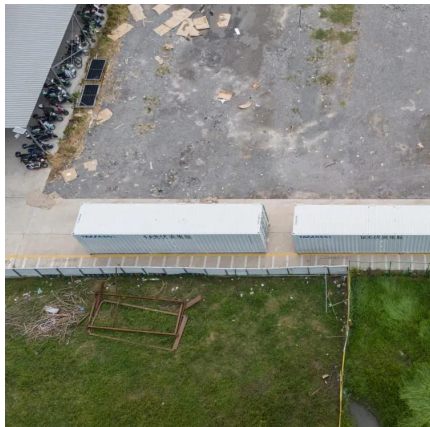

the time. Storage allows you to save that energy and use it later in the day, like when you turn the heat on at night or run the dishwasher after dinner or even when the power goes out.

What is the best way to install solar?

The best way to install solar is through a qualified professional who holds a certification to do so and works with high-quality solar panels. The industry-standard certification is awarded through the North American Board of Certified Energy Practitioners (NABCEP). How can I avoid getting scammed while going solar?
