

Slovakia energy storage power station subsidies

Overview

In November, the European Commission approved a direct grant scheme from Slovakia for developing energy storage facilities and promoting the transition to a net-zero economy. On 3 November 2023, the European Commission approved a Slovak direct grant scheme of EUR 44 million (USD 47 million). What is one priority of Slovakia's energy policy?

One of the main priorities of Slovakia's Energy Policy, approved in 2006, is to increase the share of renewable energy sources in power and heat generation in order to create appropriate additional resources needed to cover domestic demand. Analysis of regional renewable energy potentials.

Is biomass a viable energy source in Slovakia?

Biomass currently dominates electricity generation from renewables, followed by biogas, solar, and hydropower. Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles.

Should SHPPs be integrated into Slovakia's energy mix?

The integration of SHPPs into Slovakia's energy mix could be a strategic move towards enhancing the country's energy landscape, offering a sustainable and efficient method to increase renewable energy production while contributing to local development and environmental conservation.

What is Slovakia's national energy and Climate Plan?

Slovakia's National Energy and Climate Plan sets an ambitious target of achieving a 19.2% share of renewable energies in gross final energy consumption by 2030.

Why is wind energy untapped in Slovakia?

Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles. Since 2009, the

construction of wind power plants has almost completely halted, with two small wind parks existing in Cerová and Myjava.

How much electricity does Slovenské elektrárne produce?

As reported by Slovenské elektrárne, the power plant has already generated over 150 GWh of electricity and is currently producing enough to meet the needs of approximately 750,000 households. The culmination of this testing phase will be running the unit continuously at 100% output for 144 hours.
