

Solar panels industry

Overview

What will drive the growth of solar PV panels industry?

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive the growth of solar PV panels industry in the coming years. Asia Pacific held the largest market share of over 54.0% in 2023.

What is the global solar panel market size?

Get a personalised briefing?

Have Questions?

The global Solar Panel Market size is expected to reach USD 387.2 Billion in 2034 registering a CAGR of 8.9%. Our report provides a comprehensive overview of the industry, including key players, market share, growth opportunities and more.

How big is the solar panel industry in 2021?

Solar Panels industry size was valued at USD 84.35 billion in 2021. Increased environmental pollution, falling prices for materials like silver and polysilicon, and incentives and tax breaks offered by governments throughout the world for the installation of PV panels are the main primary market drivers for expansion.

How will solar impact the energy industry?

The industry remains optimistic about the role of solar in achieving energy dominance and meeting rising electricity demand. State-level initiatives and corporate demand will gain more relevance and drive solar development, potentially mitigating the impact of federal mandates.

What drives the solar panel market growth?

The solar panel market growth is driven by the way the world is progressing towards the use of renewable energy, strong government decarbonization strategies, and mounting innovation in solar panel cost and efficiency.

Where are solar panels made?

About 70% of the world's solar panels are manufactured in China, and around 10-15% of the reserve is accommodated by Chinese companies working in Southeast Asia. In February, solar PV manufacturing facilities in China paused or decreased their production due to lockdowns in several key provinces.

Solar panels industry

Solar Power Market Size, Share, Trends , Growth Report [2032]

NREL's quarterly solar industry updates provide information on trends within the solar industry. These quarterly updates cover an array of photovoltaic module and system ...
