Why is the price of lithium-ion batteries dropping?

The price of lithium-ion batteries, the essential power source behind electric vehicles (EVs) and renewable energy storage systems, is steadily dropping—and it shows no signs of stopping. This ongoing price decline is largely driven by a combination of oversupply in battery metals and a recent slowdown in electric vehicle adoption.

Is the lithium-ion battery market oversupply?

While the lithium-ion battery market is currently facing an oversupply and price decline, the long-term outlook remains strong. As battery prices continue to fall, electric vehicles will become more affordable, narrowing the price gap between EVs and traditional internal combustion engine vehicles.
