

The uses and prices of solar panels

Overview

How much do used solar panels cost?

Used: Expect to pay between \$0.10 to \$0.60 per watt for second-hand solar panels. The price range for used solar panels is wide due to the varying condition of the products. Used solar panels typically consist of a mix of “like new” used panels and heavily used panels.

How much does a second-hand solar panel cost?

Second-hand modules are sold according to cost per watt as this is the most standardized way of pricing them, similar to how the prices of new solar panels are compared. As of 2023, the price of a used solar panel can be as low as \$0.10 per watt. Even at \$0.60 per watt, used solar panels are easily snapped up.

Where can I buy used solar panels?

Variety is limited and stock for used items is lower than average. SecondSol is another website that specializes in used solar panels made by reputable manufacturers, including Canadian Solar and Sunpower. The platform caters to sellers and buyers across the globe, so if you're looking for variety this is the place to be!
