

UAE special energy storage battery customization

Overview

Are battery energy storage systems a viable solution?

Battery energy storage systems (BESS) are one viable solution. An advanced technological solution, they function by storing renewable energy which can then be used when power is required. They help address the challenge of intermittent renewable energy, and provide clean power 24 hours a day, no matter the weather conditions.

Is UAE a sustainable country?

For the UAE, renewable energy is a core pillar of its sustainability plans. Masdar, the UAE's clean energy powerhouse, is among the organizations supporting the country's efforts, both home and abroad. For instance, Masdar has committed to invest £1 billion (AED4.68 billion) in UK battery storage.

Which states are investing in battery energy storage systems?

Other states in the US are also investing in battery energy storage systems with Texas and Arizona set to record the biggest growth, increasing the nation's battery output 10-fold to 16,000 megawatts. China is also spearheading the charge for BESS.
