

UK Mobile Energy Storage Vehicle Wholesale Prices

Overview

Why are battery energy storage prices so low in Britain?

Battery energy storage revenues in Britain today are around 60% lower than they were at their peak in early 2022. This comes as frequency response markets have saturated, leading to prices one-seventh the value since then.

What is the biggest revenue stream for battery energy storage?

Trading power on the wholesale markets has become the largest revenue stream for battery energy storage. Over the lifetime of a battery built today, we forecast wholesale trading to represent 52% of total revenues. Batteries profit from the spread between their charge and discharge prices.

How do battery energy storage systems make money?

Battery energy storage systems in Great Britain earn revenue through a variety of markets with different mechanisms. The revenue stack for batteries has shifted away from ancillary services towards merchant markets. But what are the main markets, how do they operate, and how will prices develop over time?

.

Could operational utilization services be valuable for grid-scale battery energy storage?

The size of this market has grown by an average of 50% per year over the past four years. Could these services prove valuable for grid-scale BESS?

Out of the three general flexibility service designs, Operational Utilization services could be the best-suited to grid-scale battery energy storage.

UK Mobile Energy Storage Vehicle Wholesale Prices

British BESS earns second-highest daily total price for 2024

Battery energy storage systems (BESS) earned the second highest daily total revenue in 2024 so far, reaching a high of £250/MW, on 21 August.

January 2025: GB battery energy storage research ...

In January 2025, our battery energy storage research for Great Britain focused on the latest in BESS operations, buildout, and policy updates.
