

UK solar irrigation system

Overview

How does a solar irrigation system work?

The Solar Irrigation System has an ingenious solar pump, which automatically regulates the amount of water it pumps i.e. it pumps the most water when the sun beats down, which is exactly when your plants need it. Install a Irrigatia Solar Irrigation System and it will never forget to water, so it is a great way of watering while you are on holiday.

Are solar-powered irrigation systems a good idea?

Solar-powered irrigation systems allow you to automatically water plants that are a long way from a tap as they are connected to a water butt or tank, but they have some drawbacks. The timer with integral pump must be higher than the water butt or tank to draw the water and must be in a sunny spot to charge, which can make placing them tricky.

What is the smallest irrigation kit?

Our smallest irrigation kit, the SOL-C12L, is perfect for smaller gardens, greenhouses, hanging baskets and pots. The Solar Impulse award-winning SOL-C24L is the ideal automated watering system for medium gardens or greenhouses. At Irrigatia, we have irrigation kits for any garden, allotment or greenhouse, at any size. Browse the full collection.

Which irrigation system is best for a large garden?

The SOL-C60 irrigation system is the perfect automatic watering solution for those with large garden. The SOL-C120 irrigation kit provides optimal watering for large domestic gardens, borders and profes. The SOL-C180 irrigation system is ideal for use in large gardens, borders, allotments, horticulture .

How does the irrigation system work?

When paired with your smart device, the system automatically waters your plants at preset intervals and volumes, and alerts you automatically when the

reservoir runs out of water. Choose between remote functioning via the app or manual control of irrigation.

How does a self-watering drip irrigation system work?

This solar-powered self-watering drip irrigation system uses up to 70% less water compared to standard irrigation systems. It draws water via the built-in water pump directly from a reservoir such as a bucket or water tank eliminating the need for a garden tap.
