

Ukrainian Solar Lighting System

Overview

What is Solar supports Ukraine?

“The Ukrainian Solar Energy Association is proud to launch the ‘Solar Supports Ukraine’ campaign together with European solar industry associations. The campaign aims to provide solar energy benefits to people in need across Ukraine.

Why is solar energy important in Ukraine?

The campaign aims to provide solar energy benefits to people in need across Ukraine. Solar energy has a great potential for providing electricity and heat where the centralised supply is not possible due the war. Every solar kilowatt matters.”.

How much solar power does Ukraine have in 2024?

Figures from the Solar Energy Association of Ukraine (SEAU) earlier this year showed that the country added around 850MW of solar PV capacity in 2024, the majority of which came from self-consumption systems installed by businesses. It’s “become a trend”, Semenyshyn says.

Can solar power plants help Ukrainian society?

“Solar power plants can help Ukrainian society,” Sokolovskyi says, by giving energy independence to private citizens and businesses. Moreover, support for critical infrastructure like hospitals, clinics and schools – the kind of work Semenyshyn’s Repower Ukraine does – often comes from PV and energy storage combined.

Does Ukraine need a long-term energy system?

More than ever, Ukraine needs support to transition towards a long-term energy system that is resilient, flexible and secure. The EU has the expertise, the ability and the will to help make that happen. Ukraine's energy systems have suffered significant damage since the full-scale invasion of 2022.

Did Ukraine install 22 solar PV projects during wartime?

Walburga Hemetsberger, CEO of SolarPower Europe (she/her) said; “I commend Energy Act for Ukraine on their achievement of installing 22 solar PV projects in Ukraine during wartime. These projects provide stable electricity to hospitals and schools, helping people and offering a ray of hope.
