

# **Vietnam Peak Valley Energy Storage Project**

## Overview

---

Can a Honeywell battery energy storage system be used in Vietnam?

First announced at the annual U.S.-Vietnam Energy Security Dialogue, the project plans to use a Honeywell Battery Energy Storage System (BESS) integrated into a 50-megawatt peak solar farm operated by AMI Khanh Hoa.

Can energy storage help Vietnam meet climate goals?

Co-funded by a \$3 million grant from the U.S. Mission, the pilot project will demonstrate how energy storage can help Vietnam integrate more renewable energy into its power system to meet ambitious climate goals.

Will Vietnam's first pumped hydropower plant boost national energy security?

This will be Vietnam's first pumped storage hydropower plant and one of EVN's key national energy projects this year. The plant is expected to boost national energy security and support Vietnam's transition to a greener, more sustainable economy.

Can battery energy storage be commercially viable in Vietnam?

The BESS project aims to demonstrate the commercial viability of battery energy storage in Vietnam and showcase the practical benefits of renewable energy, including its reliability and efficiency. It also seeks to help Vietnam meet its climate action targets.

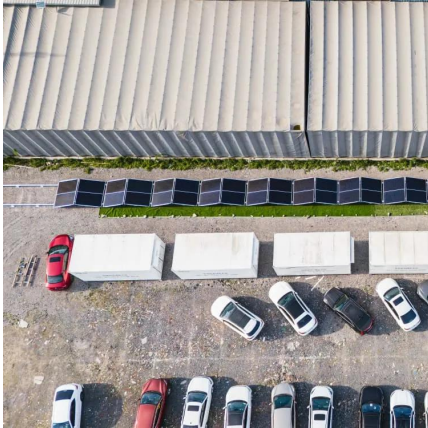

Did Marubeni launch a megawatt-scale battery storage demonstration project in Vietnam?

The project's official inauguration event held in December. Image: VinGroup. A green energy subsidiary of Japanese conglomerate Marubeni has brought online a megawatt-scale battery storage demonstration project in Vietnam.
