

Which brand has a power station for battery swapping

Overview

Chinese EV brand Nio has installed its first fourth-generation Power Swap Stations in China. When drivers pull into a station, a tap on the dash screen triggers a robotic arm to remove the vehicle's battery pack and replace it with a fully charged one from the inventory. Which car brand has the most battery swap stations in China?

NIO is the car brand that owns and operates the most charging piles and Power Swap Stations in China. By the end of April, NIO had installed 2,454 Power Swap Stations and 22,138 chargers, and connected with over 1.5 million non-NIO chargers worldwide. Its battery swap network runs through 13 trunk expressways and 11 city clusters in China.

What is a power swap station?

The pioneering third-generation Power Swap Station offers a seamless and efficient solution that's faster than super-charging, where rather than recharging the same battery, the system swaps it out for a fully charged one, ensuring minimal wait time.

What is NIO Power Swap station 4.0?

The first batch of NIO Power Swap Station 4.0 went live. The fourth generation supports automated battery swap for multiple brands and different vehicle models. NIO, ONVO and all battery swap strategic partners can access the new stations for a comprehensively elevated battery swapping experience that is more convenient than gas refueling.

How many battery swap stations does Nio have?

NIO Power Swap Station 4.0: As of June 13, 2024, NIO's battery swap network consisted of 2,432 stations in China. The company's charging points number over 22,600. According to NIO founder, chairman, and CEO William Li (via CnEVPost), the 4.0 battery swap stations can break even if they provide 60 swaps per day.

How do EV power swap stations work?

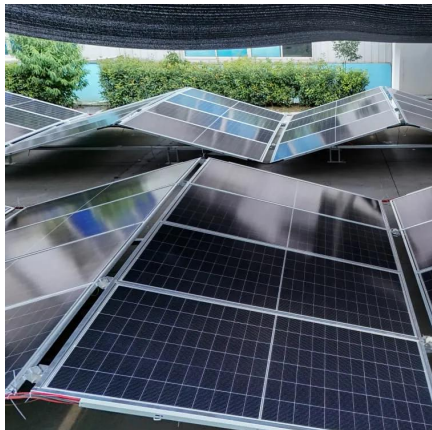

Chinese EV brand Nio has installed its first fourth-generation Power Swap Stations in China. When drivers pull into a station, a tap on the dash screen triggers a robotic arm to remove the vehicle's battery pack and replace it with a fully charged one from the inventory.

Is the power swap station 4.0 fully automatic?

According to the Chinese manufacturer, the Power Swap Station 4.0 is fully automatic. Thanks to six ultrawide-FOV LiDARs and four Orin X chips, which have a total computing power of 1,016TOPS, the battery swap process can be started with just one tap on the car's center display or even without being in the car.
