

Which is the largest energy storage project in Vanuatu

Overview

The Renewable Energy Systems with Storage for Efate and Tanna (RESSET) project in Tanna, Vanuatu, was funded by New Zealand's Ministry of Foreign Affairs and Trade (MFAT). Why is Vanuatu launching a solar farm?

The project underscores the Vanuatu government's commitment to decarbonising the electricity supply and aligning with international climate change goals. Notably, this solar farm represents the final direct-to-grid PV installation that can operate without an accompanying battery. Future projects will necessitate energy storage solutions.

Will solar power boost Vanuatu's energy independence and climate resilience?

The project aims to support the use of solar power and battery storage on the islands of Efate and Tanna, boosting Vanuatu's energy independence and climate resilience. New Zealand's Deputy Prime Minister and Minister for Foreign Affairs, Winston Peters, confirmed the country's commitment during a press conference held in Port Vila on Wednesday.

What future projects require energy storage solutions?

Future projects will necessitate energy storage solutions. The upcoming Renewable Energy Solar and Storage on Efate and Tanna (RESSET) project, following this milestone, will provide an additional 5 MWp of PV generation, complete with a substantial stabilising and energy storage battery of 6.75MWh. Welcome to the discussion.
