Overview

Who makes explosion proof lithium ion battery?

As 19 years manufacturer of explosion proof battery, Large Power provide Exib & Exd explosion proof Lithium ion Battery for mine, oil well, petrochemical and other explosion-proof places.

Are lithium batteries prone to thermal runaway?

Despite the rapid progress in material development and technology for higher-energy-density and safer lithium batteries, current lithium battery technology is still exposed to the risk of thermal runaway, although the probability is relatively low.

Can lithium batteries be used in mining?

The mining industry has encountered difficulties in deploying large LIB packs (more than 100 kWh) for the underground coal environment, and currently, most battery applications are only in low-power devices with currents drawn in the milli-amperes range .

Can SAFT Batteries be used in explosive environments?

Saft is offering a number of solutions for use in explosive atmospheres; either as a partially tested component or certified equipment. Saft batteries' long lifetime is also an advantage to avoid replacement in remote or hard-to-reach locations.

Who makes the best custom lithium ion battery pack?

Since its foundation in 2002, Large Power has been dedicated to provide the best custom lithium ion battery pack for worldwide users. And has accumulated rich experience in li ion battery field.

Can lithium battery pack be used in underground coal mining?

In coal mining industry, specifically in underground coal mining, the requirements on lithium battery pack applications are very stringent with various engineering constraints imposed on them, which, in most cases, make the application of lithium technology in such an environment unfeasible or impractical.
